

AUTOMOTIVE TECHNICIAN TRAINING CENTER presents ...

“Hands on Hybrid Training”

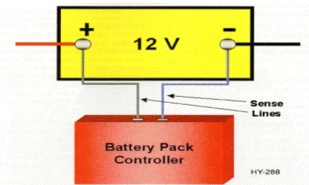

Hybrid vehicles & parts will be in the shop for testing and familiarization

Wear work clothes, you will be at work stations as well working on the hybrid vehicles!

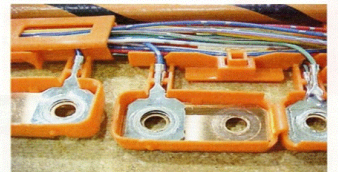

This very special training class will cover:

- *Hybrid vehicle familiarization*
- **Vehicle maintenance procedures**
- *High voltage shut off procedure*
- **High voltage electronics component testing**
- *Scan tool parameters*
- **Pin point voltage testing procedures**
- *Pattern failure traits*

What should the voltage be when measured at this location?

What should the voltage be when measured at this location?

Instructor: John Forro- AST Training is an A.S.E. Master certified automobile technician with L-1 Advanced Engine Performance certification as well. John has authored 12 automotive manuals to date, produced several automotive training videos, appeared in many of the industry trade magazines and won the Motor Top 20 tool award for Silver Bullets. John is also certified in heavy duty truck, A/C Recovery, body mechanical, State emissions and is also one of the State's lemon-law inspectors. John has been and continues to be a full time working automotive instructor and technician, which enables him to relate to the students needs as technicians. John has taught for several of the Nation's leading companies such as Snap-on, Firestone, Mac, OTC, A/C Delco, Federated, Midas, NAPA, ATA, ASA, ASC,

STS, LTS, CARS and many others. John is extremely proud of AST and is committed to its first rate reputation which he feels will only be maintained by providing the highest standard training classes and materials along with customer satisfaction that is unsurpassed by any other in our industry!

At the present, John is servicing, repairing & diagnosing at his own training and repair facility, the Toyota hybrids for the local Toyota dealership in Ohio as well as other OEM hybrids!
