

AUTOMOTIVE TECHNICIAN TRAINING CENTER presents.....

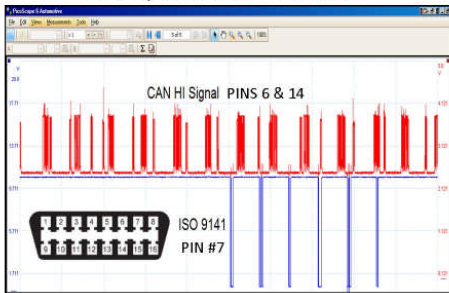

CAN Diagnostics at the DLC

Frequently all of the information that you need to accurately diagnose a communications issue is available at the DLC. We will take a look at using this information with a:

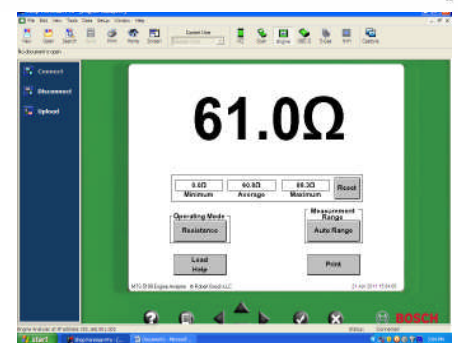

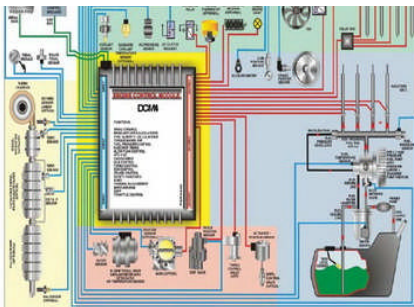

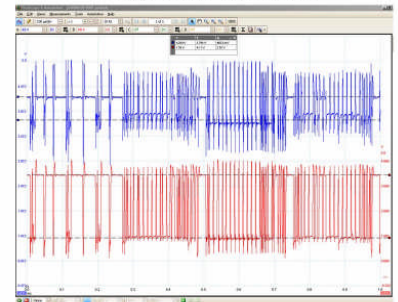

Digital Storage Oscilloscopes, Scanners and Digital Multi-Meters

Verify Communications!

Corrupt PCM = A No Start

Al Santini aka "The Sailor" has been in the industry for over 42 years. He is a member of North American Council of Automotive Teachers and a member of Illinois College Automotive Instructors Association. He is presently an independent trainer primarily working with various State Emission Programs as a seminar presenter. OBD-II diagnosis and repair seminars are his specialties along with training to identify methods of testing and repair of monitor setting failures with the ultimate goal of getting the vehicle passed. Al is the author of numerous electrical & electronics textbooks for Cengage Learning.
